FOREWORD

This publication is the outcome of the analysis of data collected on retail prices of selected commodities and services throughout the state carried out by this Department in November 2008. Figures for 2006 have been included for comparison and to monitor price movement and inflation within the two years interval. As usual, an important objective of the publication is to serve an important input in monitoring macro-economic stability which has been one of the targets of Government development agenda. It will also serve to assess the impact of various government policies and programmes both at national and sub-National (state) levels on cost of basis needs.

2. The Department is grateful to the various store managers, individual buyers and sellers which supplied the data compiled in this publication.
3. Comments and suggestions for the improvement of future editions are welcome.

Department of Research & Statistics
Ministry of Finance & Planning

CHAPTER ONE

1.0 INTRODUCTION ,SURVEY METHODOLOGY AND OBSERVATIONS

1.1 INTRODUCTION

Important economic indicators including cost of basic needs, Gross Domestic Product (GDP), Inflation rate and Consumer Price Index (CPI) depend on availability of price data for its measurement and computations. Thus, the survey seek to satisfy this data need. The report could also serve a useful guide in monitoring the commodities/services available/not available in different parts of the state.

1.2 OBJECTIVES OF THE SURVEY

The major objectives of the survey are:

1. generate information on prices of commodities and services across the state
2. provide information on availability of goods and services in different parts of the state
3. study trend in price movement overtime
4. provide data for the computation of important economic and statistical indicators e.g. inflation rate.
5. to underpin the effect of government policies and programme on cost of basic needs for the purpose of fine tuning.
6. to establish price database for future reference and for further research.

1.3 COVERAGE OF THE SURVEY

The survey covered the whole state on sample basis. Both urban and rural communities were included.

1.4 SCOPE OF THE SURVEY

The exercise obtained information on prices and availability of selected goods and services across the state. The following groups of items were covered.

1. Major food items
2. Processed foods
3. Drinks & Tobacco
4. Medical & Health
5. Miscellaneous Goods and Services
6. Building Materials
7. Accommodation, Fuel and Energy
8. Communications

Varieties of some items were included in the questionnaire for example, bears brown, beans white.

1.5 DATA COLLECTION METHODOLOGY

The price information was collected using well designed questionnaires. The questionnaires were administered on the informants by trained enumerators. Supervisors scrutinize the returns by enumerators to ensure quality and accuracy. Informants were majorly goods sellers and service providers. The administration of the questionnaires was carried out mainly in market outlets and retail shops. At least two informants provided information on each item in each market point. The information recorded are bargained prices. Measuring instruments including weighing scales and spring balance were used in determining quantity of commodities with no standard unit of measurement.

Prices of packaged items and services e.g. television are recorded with weight of 1 (one) while those of items that are sold loose e.g. gari, rice, beans etc are recorded with their measured weights. The measures are recorded in either grams or kilograms depending on the magnitude of weight.

Liquids are measured in centiliters or liters and clothing materials in 5 yards or 1 yard as applicable.

1.6 ANALYSIS PROCEDURE

After thorough editing by supervisors, average prices from the different informants were calculated. Further statistical analysis using Ms Excel package was carried out to obtain the average prices of each item in the different local governments areas and the price index at the state level. Also the aggregate prices for the state were calculated for each item. In addition, Price Index was calculated for years 2006 and 2008 using 2006 as base.

1.7 REFERENCE PERIOD

The prices were retail prices of goods and services in the month of November in the two years presented (that is 2006 and 2008).

1.8 CONVERSION TABLE

| S/N | ITEMS | COMMON UNIT OF SALE | EQUIVALENT WEIGHT / VOLUME |
|-----|------------------------|---------------------|----------------------------|
| | FOOD ITEMS | | |
| 1 | Yam | | |
| | Small | 5 Tubers | 7kg |
| | Big | 5 Tubers | 13kg |
| 2 | Rice | Konqo | 1.6kq |
| 3 | Gari | Kongo | 1.5kg |
| 4 | Cassava flour | Konqo | 1.25kg |
| 5 | Yam flour | Kongo | 1.5kg |
| 6 | Semovita | Packet | 1kg |
| 7 | Wheat flour | Kongo | 1kg |
| 8 | Wheat grains | Kongo | 1.75kg |
| 9 | Beans | Kongo | 1.5kq |
| 10 | Maize | Kongo | 1.5kg |
| 11 | Guinea corn | Kongo | 1.5kg |
| 12 | Millet | Kongo | 1.75kg |
| 13 | Soyabeans | Kongo | 1kg |
| 14 | Cray Fish | Kongo | 250gm |

| 92 | Dettol | Bottle (Big, Small) | 125ml (Medium) |
| 93 | Izal | Bottle (Big, Small) | 100ml (Medium) |
| 94 | Harpic | Bottle (Big, Small) | 500ml (Medium) |

1.9 OBSERVATIONS

The report presents the retail prices of selected commodities and service in 2008 and prices indices with the year 2006 as the base period. The purpose of the price indices is to show price movement of an item by expressing the changes as percentage with reference to the value of the item and some earlier date called the base period. The base period is given the value of 100. The price indices calculated in this report ranges between 55 and 501 with only 26 out of 253 items recording index less than 100 in 2008.

The general rise in price level as noted in the previous edition could be the result of low performance of the productive sector of the economy, the persistent energy crises, fall in the value of Naira and poor storage system for seasonal (agricultural) commodities among others.

It is hoped that addressing the likely factors mentioned above coupled with the different programmes of government aimed at poverty reduction, the rise in price of commodities will be stemmed and the much desired micro-economic stability will be achieved.

**COMPARATIVE ANALYSIS OF AVERAGE PRICE OF SELECTED COMMODITIES
AND SERVICES BY LOCAL GOVERNMENT IN ONDO STATE**
